

Manisa Nayak

khushinayak127@gmail.com — +91-7077780027 — LinkedIn — GitHub

Career Summary

Computer Science student with a strong foundation in full-stack development, data structures, and problem-solving. Experienced in building scalable, AI-integrated web applications and working with cloud technologies. Passionate about developing efficient, user-focused solutions.

Education

B.Tech in Computer Science and Information Technology

ITER, Siksha 'O' Anusandhan University — CGPA : 9.2 (Till 5th Sem) 2023 - 2027

12th

St.Xavier's High School — Percentage : 76 2021 - 2023

Technical Skills

Languages: Java, Python, TypeScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, MongoDB

Experience

Microsoft Azure Intern

Jan 2026 - Feb 2026

Microsoft Elevate Initiative (AICTE Collaboration)

- Completed a 4-week internship focused on cloud computing, AI, and data-driven applications.
- Gained hands-on experience with Microsoft Azure services, cloud deployment, and workflows.
- Worked with Power BI for data visualization and explored Microsoft Copilot for AI-assisted development.
- Developed an AI Music Remix & Mood Generator application using modern web technologies.
- Applied AI/ML fundamentals and cloud-based system design in real-world scenarios.

Projects

FOCUSYNC – Privacy-First Productivity & Analytics App

Aug 2025 – Oct 2025

TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, Google Cloud Run

- Built a productivity application with Pomodoro-based focus tracking, real-time analytics, and burnout detection.
- Integrated an AI-powered coach using Gemini API for personalized productivity insights.
- Designed modular and scalable frontend architecture with optimized performance.

SkillVerse – AI-Powered E-Learning Platform

Sep 2025 – Dec 2025

TypeScript, React, Tailwind CSS, Framer Motion, Gemini API

- Developed a feature-rich learning platform with structured courses, gamification, and progress tracking.
- Implemented analytics, XP-based progression, and dynamic content rendering.
- Enhanced user engagement by designing interactive UI components and smooth animations using Framer Motion.

STYLA – AI Fashion Stylist

Dec 2025 – Jan 2026

Python, OpenAI API, Multi-Agent Systems

- Designed an AI-based recommendation system for personalized outfit suggestions.
- Implemented context-aware workflows for improved accuracy and user experience.
- Integrated multiple AI agents to handle styling logic, improving recommendation relevance and personalization.

Achievements

- Google AI Agents Intensive Capstone(Nov 2025): Secured 3rd place by developing STYLA, a multi-agent AI-based recommendation system.
- Hack2Skill DreamFlow Buildathon (Jan 2026): Achieved 2nd place by building BuildBuddy, an AI-powered hackathon assistant.
- GSSoC 2026 (April 2026): Selected as an Open Source Contributor, contributing to real-world projects with collaborative development and version control practices.
